Career Objective

Results-driven pre-final year B.E. AI & ML student with proven expertise in LLM fine-tuning, data analytics, and edge AI deployment. Adept at building scalable, production-ready AI systems and delivering actionable insights through advanced analytics. Seeking an AI/ML Engineer or Data Analyst role to leverage deep learning, model optimization, and business intelligence in solving real-world problems within a high-impact, innovation-driven environment.

Education

B.E. Computer Science Engineering (AI & Machine Learning) CGPA: 8.19 — Expected 2027
Sri Krishna College of Technology, Coimbatore

Technical Skills

Languages	Python, SQL, C++, Java
ML/DL Frameworks	PyTorch, TensorFlow, Scikit-learn, HuggingFace, Unsloth, PEFT
AI Domains	Computer Vision, NLP, LLM Fine-Tuning, Edge AI Deployment
Data Analytics	Power BI, Tableau, Excel (Advanced), SQL, Statistical Analysis, ETL Pipelines
Data Science	Pandas, NumPy, Matplotlib, Seaborn, Plotly, SciPy
Tools & Platforms	Git, Docker, Linux, AWS, Azure, FastAPI, OpenCV, Raspberry Pi

Internship Experience

Data Scientist Intern — Postulate Info Tech Private Limited, Coimbatore Feb 2025 – Mar 2025

- Built a real-time object detection pipeline using YOLOv8 and OpenCV for road detection, evaluated with mAP, precision, recall, and ROC-AUC on large-scale datasets.
- Implemented ML (Logistic Regression, SVM, Random Forest) and DL (CNN, ANN) models for Breast Cancer and Parkinsons prediction with comprehensive evaluation.
- Applied Neural Style Transfer and performed end-to-end workflows using TensorFlow, Keras, Scikit-learn, Pandas, Matplotlib, and Seaborn for preprocessing, training, evaluation, and data analysis.

Projects

MindfulChat – Fine-Tuned LLM Mental Health Advisor *Unsloth, LLaMA-2-7B, LoRA, PEFT*

- Fine-tuned LLaMA-2-7B using LoRA + Unsloth on a mental health counseling corpus, achieving 92% accuracy on domain Q&A with empathetic response generation, fully local inference, and zero API dependency.

Lightweight Traffic Sign Detection for Edge Devices *YOLOv5n, TensorFlow Lite, Raspberry Pi 4*

- Optimized YOLOv5n via INT8 quantization, achieving 10 FPS at 88% mAP on Indian traffic sign dataset with on-device deployment and zero cloud dependency.

Unstop Platform MCP Server *FastAPI, Model Context Protocol, MCP Python SDK*

- Built an MCP server leveraging Unstop public APIs for contest discovery, participation tracking, and analytics — enabling any MCP-compatible AI assistant to query live Unstop data via standardized protocol.

Partnership & Sales Strategy Finder *LLM, Agent.ai*

- Built and published an AI agent that generates a ranked list of 20+ complementary products with partnership probability scores, advertising strategies, sales tactics, and profit insights for each.

Open Source Contributions

TechiesLog — Flutter, Dart, Provider github.com/vinoth322006/techieslog

- Authored and maintain an MIT-licensed, open-source, privacy-first offline productivity and personal finance tracker, featuring expense tracking, task management, goal setting, and analytics; architected a modular Flutter application with dark/light themes, offline-first local storage, zero ads/tracking, and a complete APK release pipeline.

Achievements

- Design Patent No. 421785-002** – Baby chair with integrated airbag safety mechanism (co-inventor)
- 2nd Place** – Generative AI Project Expo (50+ teams)
- Built and published 5 AI agents at Agent Build Day 2025, HackerEarth & Agent.ai, Bengaluru; “Partnership & Sales Strategy Finder” is publicly available on the platform
- NPTEL Elite + **Silver** – Cloud Computing (Top **7%** of 10,000+) and NPTEL Topper + **Gold** – Big Data Computing

Certifications

- Salesforce Certified Agentforce Specialist**
- Microsoft Azure Fundamentals (AZ-900)

Leadership & Extracurricular Activities

- Campus Ambassador, IIT Bombay – increased event participation by 20% through targeted outreach campaigns
- Member, Institution’s Innovation Council (IIC) – organized research methodology workshops for peers
- Peer Tutor – conducted weekly Python & ML sessions for junior undergraduates

Volunteering

- English Tutor — Taught underprivileged school students every week under U&I Organization at Don Bosco Illam, Coimbatore.
- IoT Mentor — Mentored emerging IoT enthusiasts at Wheels on Bot, Batch 2, providing hands-on technical support for innovative solutions.
- ML Educator — Led sessions on Machine Learning, Python, NumPy, Pandas, and Matplotlib to enhance peer understanding of coding fundamentals.
